Subject Index of Volume 33 Number 6

- Accelerating forces
vibration dewatering, 331
- Adsorption column
reliable numerical calculation of the break-through curve of adsorption column, 117
- Adsorption kinetics
adsorption kinetics of emulsifiers at oil–water interfaces and their effect on the mechanical emulsification, 307
- Alumina support
the oxidation of carbon monoxide by oxygen over platinum-, palladium- and rhodium catalysts from 10^{-10} to 1 bar, 363
- Batch distillation
strategies for slop cut recycling in multicomponent batch distillation, 23
- Bicarbonate solutions
validation of gas-lift capillary bubble column as a simulation device for a reactor, by study of CO_2 absorption in Na_2CO_3 - NaHCO_3 solutions, 55
- Binary diffusivities
binary diffusivities of liquid mixtures of methyl myristate and methyl palmitate at ambient pressures, 51
- Binary immiscible liquids
local rates of heat and mass transfer during condensation of non-eutectic vapours of binary immiscible liquids, 429
- Binary mixtures
high-pressure phase equilibria and densities of the binary mixtures carbon dioxide–oleic acid, carbon dioxide–methyl myristate, and carbon dioxide–methyl palmitate and of the ternary mixture carbon dioxide–methyl myristate–methyl palmitate, 177
- Binary systems
interfacial tensions of the binary systems carbon dioxide–oleic acid, carbon dioxide–methyl myristate, and carbon dioxide–methyl palmitate and of the ternary system carbon dioxide–methyl myristate–methyl palmitate at high pressures, 193
- Borax solutions
filtration of borax solutions through perlite, 151
- Boundary layer turbulizers
performance characteristics of a packing with boundary layer turbulizers. III. Liquid film controlled mass transfer, 437
performance characteristics of a packing with boundary layer turbulizers. IV. Gas–film controlled mass transfer, 443
performance characteristics of packings with boundary layer turbulizers II. The packing dynamic hold-up, 101
- Breakthrough curve
reliable numerical calculation of the break-through curve of adsorption column, 117
- Bubble column
on the local gas holdup and flow pattern in standard-type bubble columns, 7
validation of gas-lift capillary bubble column as a simulation device for a reactor, by study of CO_2 absorption in Na_2CO_3 - NaHCO_3 solutions, 55
- Bulk solids
heat transfer and flow of bulk solids in a moving bed, 73
- Carbon dioxide
high-pressure phase equilibria and densities of the binary mixtures carbon dioxide–oleic acid, carbon dioxide–methyl myristate, and carbon dioxide–methyl palmitate and of the ternary mixture carbon dioxide–methyl myristate–methyl palmitate, 171
interfacial tensions of the binary systems carbon dioxide–oleic acid, carbon dioxide–methyl myristate, and carbon dioxide–methyl palmitate and of the ternary system carbon dioxide–methyl palmitate at high pressures, 193
- Carbon monoxide
heat transfer with reaction in monoliths, 227
the oxidation of carbon monoxide by oxygen over platinum-, palladium- and rhodium catalysts from 10^{-10} to 1 bar, 363
- Carbonate solutions
validation of gas-lift capillary bubble column as a simulation device for a reactor, by study of CO_2 absorption in Na_2CO_3 - NaHCO_3 solutions, 55
- Catalytic oxidation
heat transfer with reaction in monoliths, 227
- Centrifugal dewatering
vibration dewatering, 331
- Centrifugal separation
electrostatic agglomeration and centrifugal separation of diesel soot particles, 371
- Chemical wet oxidation
a comparative study of wastewater treatment by chemical wet oxidation, 199
- Chinese reed
entrained flow gasification of coarsely ground Chinese reed, 353
- CO_2 absorption
validation of gas-lift capillary bubble column as a simulation device for a reactor, by study of CO_2 absorption in Na_2CO_3 - NaHCO_3 solutions, 55
- Coking coal
mechanical dewatering of the flotation concentrate of coking coal, 141
- Concentrated suspensions
a comparison of different approaches to calculating the currents through solid and fluidized beds and the sedimentation of concentrated suspensions of uniformly sized particles in view of a new approach which takes the counter-current into consideration, 135
- Condensation
heat transfer during film condensation—uniform description of heat and mass transfer of film flows and related processes, 277
local rates of heat and mass transfer during condensation of non-eutectic vapours of binary immiscible liquids, 429
- Convective vaporization
pool and forced convective vaporization of saturated liquid mixtures, 337
- Crystal growth dispersion
crystal growth dispersion in an MSMR crystallizer—a mathematical model, 465
- Cyanide
hollow-fiber solvent extraction of gold from alkaline cyanide solution, 33
- Cyclodimerization
synthesis of 1,5-cyclo-octadiene, 45
- 1,5-cyclo-octadiene
synthesis of 1,5-cyclo-octadiene, 45
- Cyclone
electrostatic agglomeration and centrifugal separation of diesel soot particles, 371

- Cylindrical monoliths
 - heat transfer in monoliths, 161
- Diesel soot particles
 - electrostatic agglomeration and centrifugal separation of diesel soot particles, 371
- Drying experiments
 - discrimination of fluid bed models and investigation of particle-to-gas mass transfer by means of drying experiments, 237
- Dynamic adhesion forces
 - jet agglomeration and dynamic adhesion forces, 313
- Electrostatic agglomeration
 - electrostatic agglomeration and centrifugal separation of diesel soot particles, 371
- Emulsifiers
 - adsorption kinetics of emulsifiers at oil-water interfaces and their effect on the mechanical emulsification, 307
- Entrained flow gasification
 - entrained flow gasification of coarsely ground Chinese reed, 353
- Enzymatic cleavage
 - comparison of the enzyme inhibition effect of different humic substances in aqueous solution, 325
- Esterification
 - kinetics of esterification of phthalic anhydride with 2-ethylhexanol. I. Sulfuric acid as a catalyst, 413
- Euler method
 - reliable numerical calculation of the break-through curve of adsorption column, 117
- Film flows
 - heat transfer during film condensation—uniform description of heat and mass transfer of film flows and related processes, 277
- Filtration
 - filtration of borax solutions through perlite, 151
- Fixed bed reactors
 - the kinetic averaged temperature—a new aspect in modelling fixed bed reactors, 291
- Flotation concentrate
 - mechanical dewatering of the flotation concentrate of coking coal, 141
- Flow boiling
 - flow boiling heat transfer to saturated pure components and non-azeotropic mixtures in a horizontal tube, 261
 - pool and forced convective vaporization of saturated liquid mixtures, 337
- Flow pattern
 - on the local gas holdup and flow pattern in standard-type bubble columns, 7
- Flowing bulk material
 - experimental investigation into the influence of the particle size distribution upon the local mixing mechanisms in a flowing bulk material, 39
- Fluid bed model discrimination
 - discrimination of fluid bed models and investigation of particle-to-gas mass transfer by means of drying experiments, 237
- Fluid-dynamic interaction
 - power and discharge numbers of radial-flow impellers. Fluid-dynamic interactions between impeller and baffles, 295
- Fluidized beds
 - a comparison of different approaches to calculating the currents through solid and fluidized beds and the sedimentation of concentrated suspensions of uniformly sized particles in view of a new approach which takes the counter-current into consideration, 135
- Food reactor units
 - variation of quality attributes in serially connected independent food reactor units. Part I, 61
- Fourier's theory
 - improved asymptotic approximations for transient conduction and diffusion processes, 205
- Gas distributors
 - determination of pressure drop through gas distributors in multistage fluidized-bed vessels, 419
- Gas holdup
 - on the local gas holdup and flow pattern in standard-type bubble columns, 7
- Gas phase oxidation
 - heterogeneously catalyzed gas phase oxidation of 1,3-pentadiene: products and reaction paths, 379
- Gas velocity
 - performance characteristics of a packing with boundary layer turbulizers. IV. Gas-film controlled mass transfer, 443
- Gas-film mass transfer
 - performance characteristics of a packing with boundary layer turbulizers. IV. Gas-film controlled mass transfer, 443
- Gas-lift bubble column
 - validation of gas-lift capillary bubble column as a simulation device for a reactor, by study of CO_2 absorption in Na_2CO_3 - NaHCO_3 solutions, 55
- Gas-liquid reactors
 - a review of recent chemical techniques for the determination of the volumetric mass-transfer coefficient $k_L a$ in gas-liquid reactors, 247
- Gold
 - hollow-fiber solvent extraction of gold from alkaline cyanide solution, 33
- Heat flow
 - heat transfer and flow of bulk solids in a moving bed, 73
- Heat flux
 - flow boiling heat transfer to saturated pure components and non-azeotropic mixtures in a horizontal tube, 261
- Heat transfer
 - flow boiling heat transfer to saturated pure components and non-azeotropic mixtures in a horizontal tube, 261
 - heat transfer and flow of bulk solids in a moving bed, 73
 - heat transfer and pressure drop in the plastic heat exchanger with triangular channels, 91
 - heat transfer during film condensation—uniform description of heat and mass transfer of film flows and related processes, 277
 - heat transfer in monoliths, 161
 - heat transfer to liquid-solid fluidized beds, 211
 - heat transfer with reaction in monoliths, 227
 - local rates of heat and mass transfer during condensation of non-eutectic vapours of binary immiscible liquids, 429
- Heterogeneous catalysis
 - heterogeneously catalyzed gas phase oxidation of 1,3-pentadiene: products and reaction paths, 379
- High-pressure phase equilibria
 - high-pressure phase equilibria and densities of the binary mixtures carbon dioxide-oleic acid, carbon dioxide-methyl myristate, and carbon dioxide-methyl palmitate and of the ternary mixture carbon dioxide-methyl myristate-methyl palmitate, 171
- Humic substances
 - comparison of the enzyme inhibition effect of different humic substances in aqueous solution, 325

- Hydrazine oxidation**
a review of recent chemical techniques for the determination of the volumetric mass-transfer coefficient $k_L a$ in gas-liquid reactors, 247
- Hydrodynamics**
hydrodynamics and mass transfer in an impinging-stream loop reactor aerated from the top, 285
- Hydrogen peroxide**
a comparative study of wastewater treatment by chemical wet oxidation, 199
- Hydrolysis**
comparison of the enzyme inhibition effect of different humic substances in aqueous solution, 325
- Impinging-stream loop reactor**
hydrodynamics and mass transfer in an impinging-stream loop reactor aerated from the top, 285
- Inertial force**
vibration dewatering, 331
- Interfacial tension**
interfacial tensions of the binary systems carbon dioxide-oleic acid, carbon dioxide-methyl myristate, and carbon dioxide-methyl palmitate and of the ternary system carbon dioxide-methyl myristate-methyl palmitate at high pressures, 193
- Jet agglomeration**
jet agglomeration and dynamic adhesion forces, 313
- Kinetic averaged temperatures**
the kinetic averaged temperature—a new aspect in modelling fixed bed reactors, 291
- Kinetics**
kinetics of esterification of phthalic anhydride with 2-ethylhexanol. I. Sulfuric acid as a catalyst, 413
- Liquid composition**
pool and forced convective vaporization of saturated liquid mixtures, 337
- Liquid hold-up**
some experience with the application of the percolation concept for modeling trickle-bed fluid dynamics, 67
- Liquid mixtures**
binary diffusivities of liquid mixtures of methyl myristate and methyl palmitate at ambient pressure, 51
- Liquid-solid fluidized beds**
heat transfer to liquid-solid fluidized beds, 211
- Macro-mixing**
variation of quality attributes in serially connected independent food reactor units. Part I, 61
- Mass transfer**
effect of transfer in the vapour phase on the extraction by pervaporation through organophilic membranes: experimental analysis on model solutions and theoretical extrapolation, 449
heat transfer during film condensation—uniform description of heat and mass transfer of film flows and related processes, 277
hydrodynamics and mass transfers in an impinging-stream loop reactor aerated from the top, 285
local rates of heat and mass transfer during condensation of non-eutectic vapours of binary immiscible liquids, 429
performance characteristics of a packing with boundary layer turbulizers. III. Liquid-film controlled mass transfer, 437
- Mass velocity**
flow boiling heat transfer to saturated pure components and non-azeotropic mixtures in a horizontal tube, 261
- Mathematical model**
crystal growth dispersion in an MSMPR crystallizer—a mathematical model, 465
- Mathematical reactor model**
entrained flow gasification of coarsely ground Chinese reed, 353
- Mechanical dewatering**
mechanical dewatering of the flotation concentrate of coking coal, 141
- Membrane extraction**
hollow-fiber solvent extraction of gold from alkaline cyanide solution, 33
- Methyl myristate**
binary diffusivities of liquid mixtures of methyl myristate and methyl palmitate at ambient pressure, 51
high-pressure phase equilibria and densities of the binary mixtures carbon dioxide-oleic acid, carbon dioxide-methyl myristate, and carbon dioxide-methyl palmitate and of the ternary mixture carbon dioxide-methyl myristate-methyl palmitate, 171
interfacial tensions of the binary systems carbon dioxide-oleic acid, carbon dioxide-methyl myristate, and carbon dioxide-methyl palmitate and of the ternary system carbon dioxide-methyl myristate-methyl palmitate at high pressures, 193
- Methyl palmitate**
binary diffusivities of liquid mixtures of methyl myristate and methyl palmitate at ambient pressure, 51
high-pressure phase equilibria and densities of the binary mixtures carbon dioxide-oleic acid, carbon dioxide-methyl myristate, and carbon dioxide-methyl palmitate and of the ternary mixture carbon dioxide-methyl myristate-methyl palmitate, 171
interfacial tensions of the binary systems carbon dioxide-oleic acid, carbon dioxide-methyl myristate, and carbon dioxide-methyl palmitate and of the ternary system carbon dioxide-methyl myristate-methyl palmitate at high pressures, 193
- Mixing mechanisms**
experimental investigation into the influence of the particle size distribution upon the local mixing mechanisms in a flowing bulk material, 39
- Model development**
pool and forced convective vaporization of saturated liquid mixtures, 337
- Modelling**
modelling and experimental investigation of a new type of thermocouple transformer based on the coupling of two solid-gas reactions, 125
- Monoliths**
heat transfer in monoliths, 161
heat transfer with reaction in monoliths, 227
- Moving beds**
heat transfer and flow of bulk solids in a moving bed, 73
- MSMPR crystallizer**
crystal growth dispersion in an MSMPR crystallizer—a mathematical model, 465
- Multistage fluidized bed vessels**
determination of pressure drop through gas distributors in multistage fluidized-bed vessels, 419
- Neural networks**
neural network modelling for photochemical processes, 319
- NMR flow imaging**
NMR flow imaging of pastes in steady-state flows, 385

- Non-eutectic vapours
 - local rates of heat and mass transfer during condensation of non-eutectic vapours of binary immiscible liquids, 429
- Non-Newtonian fluids
 - nucleate boiling of non-Newtonian fluids in a stirred tank reactor, 459
- Normalized method
 - discrimination of fluid bed models and investigation of particle-to-gas mass transfer by means of drying experiments, 237
- Nucleate boiling
 - nucleate boiling of non-Newtonian fluids in a stirred tank reactor, 459
- Nuclei population density
 - crystal growth dispersion in an MSMR crystallizer—a mathematical model, 465
- Oil–water interfaces
 - adsorption kinetics of emulsifiers at oil–water interfaces and their effect on the mechanical emulsification, 307
- Organophilic membranes
 - effect of transfer in the vapour phase on the extraction by pervaporation through organophilic membranes: experimental analysis on model solutions and theoretical extrapolation, 449
- Orifice distributors
 - determination of pressure drop through gas distributors in multistage fluidized-bed vessels, 419
- Ozone
 - a comparative study of wastewater treatment by chemical wet oxidation, 199
- Packed-bed reactors
 - wall-to-liquid mass transfer in a packed-bed reactor: influence of Schmidt number, 189
- Packing
 - performance characteristics of a packing with boundary layer turbulizers. III. Liquid-film controlled mass transfer, 437
 - performance characteristics of packings with boundary layer turbulizers. II. The packing dynamic hold-up, 101
- Packing dimensions
 - performance characteristics of a packing with boundary layer turbulizers. IV. Gas-film controlled mass transfer, 443
- Packing dynamic hold-up
 - performance characteristics of packings with boundary layer turbulizers II. The packing dynamic hold-up, 101
- Palladium catalyst
 - the oxidation of carbon monoxide by oxygen over platinum-, palladium- and rhodium catalysts from 10^{-10} to 1 bar, 363
- Particle collision
 - jet agglomeration and dynamic adhesion forces, 313
- Particle size distribution
 - experimental investigation into the influence of the particle size distribution upon the local mixing mechanisms in a flowing bulk material, 39
- Particle-to-gas mass transfer
 - discrimination of fluid bed models and investigation of particle-to-gas mass transfer by means of drying experiments, 237
- 1,3-pentadiene
 - heterogeneously catalyzed gas phase oxidation of 1,3-pentadiene: products and reaction paths, 379
- Percolation
 - some experiences with the application of the percolation concept for modeling trickle-bed fluid dynamics, 67
- Perlite
 - filtration of borax solutions through perlite, 151
- Permeate pressure
 - effect of transfer in the vapour phase on the extraction by pervaporation through organophilic membranes: experimental analysis on model solutions and theoretical extrapolation, 449
- Pervaporation
 - effect of transfer in the vapour phase on the extraction by pervaporation through organophilic membranes: experimental analysis on model solutions and theoretical extrapolation, 449
- Photochemical engineering
 - neural network modelling for photochemical processes, 319
- Photolysis
 - neural network modelling for photochemical processes, 319
- Phthalic anhydride
 - kinetics of esterification of phthalic anhydride with 2-ethylhexanol. I. Sulfuric acid as a catalyst, 413
- Physical model
 - vibration dewatering, 331
- Plastic heat exchanger
 - heat transfer and pressure drop in the plastic heat exchanger with triangular channels, 91
- Platinum catalyst
 - the oxidation of carbon monoxide by oxygen over platinum-, palladium- and rhodium catalysts from 10^{-10} to 1 bar, 363
- Plug flow reactor
 - modelling and validation of soot concentration patterns of turbulent diffusion flames based on data from plug flow reactor experiments, 401
- Pool boiling
 - pool and forced convective vaporization of saturated liquid mixtures, 337
- Power and discharge numbers
 - power and discharge numbers of radial-flow impellers. Fluid-dynamic interactions between impeller and baffles, 295
- Pressure drop
 - determination of pressure drop through gas distribution in multistage fluidized-bed vessels, 419
 - heat transfer and pressure drop in the plastic heat exchanger with triangular channels, 91
- Radial-flow impellers
 - power and discharge numbers of radial-flow impellers. Fluid-dynamic interactions between impeller and baffles, 295
- Rhodium catalyst
 - the oxidation of carbon monoxide by oxygen over platinum-, palladium- and rhodium catalysts from 10^{-10} to 1 bar, 363
- Saturated liquid mixtures
 - pool and forced convective vaporization of saturated liquid mixtures, 337
- Saturation pressure
 - flow boiling heat transfer to saturated pure components and non-azeotropic mixtures in a horizontal tube, 261
- Schmidt number
 - wall-to-liquid mass transfer in a packed-bed reactor: influence of Schmidt number, 189
- Sedimentation
 - a comparison of different approaches to calculating the currents through solid and fluidized beds and the sedimentation of concentrated suspensions of uniformly sized particles in view of a new approach which takes the counter-current into consideration, 135
- Single phase flow
 - heat transfer to liquid–solid fluidized beds, 211

- Size enlargement
jet agglomeration and dynamic adhesion forces, 313
- Slit distributors
determination of pressure drop through gas distributors in multistage fluidized-bed vessels, 419
- Slop cut recycling
strategies for slop cut recycling in multicomponent batch distillation, 23
- Sodium sulphite oxidation
a review of recent chemical techniques for the determination of the volumetric mass-transfer coefficient $k_L a$ in gas-liquid reactors, 247
- Solid beds
a comparison of different approaches to calculating the currents through solid and fluidized beds and the sedimentation of concentrated suspensions of uniformly sized particles in view of a new approach which takes the counter-current into consideration, 135
- Solid-gas reactions
modelling and experimental investigation of a new type of thermocouple transformer based on the coupling of two solid-gas reactions, 125
- Solvent extraction
hollow-fiber solvent extraction of gold from alkaline cyanide solution, 33
- Soot concentration patterns
modelling and validation of soot concentration patterns of turbulent diffusion flames based on data from plug flow reactor experiments, 401
- Stability limits
development and assessment of correlations for predicting stability limits of swirling flames, 393
- Steady-state flows
NMR flow imaging of pastes in steady-state flows, 385
- Stirred tank reactor
nucleate boiling of non-Newtonian fluids in a stirred tank reactor, 459
- Swirling flames
development and assessment of correlations for predicting stability limits of swirling flames, 393
- Swirling flow systems
development and assessment of correlations for predicting stability limits of swirling flames, 393
- Ternary mixtures
high-pressure phase equilibria and densities of the binary mixtures carbon dioxide-oleic acid, carbon dioxide-methyl myristate, and carbon dioxide-methyl palmitate and of the ternary mixture carbon dioxide-methyl myristate-methyl palmitate, 171
interfacial tensions of the binary systems carbon dioxide-oleic acid, carbon dioxide-methyl myristate, and carbon dioxide-methyl palmitate and of the ternary system carbon dioxide-methyl myristate-methyl palmitate at high pressures, 193
- Thermal reactor power
the kinetic averaged temperature—a new aspect in modelling fixed bed reactors, 291
- Thermochemical transformer
modelling and experimental investigation of a new type of thermocouple transformer based on the coupling of two solid-gas reactions, 125
- Tinical insolubles
filtration of borax solutions through perlite, 151
- Transient conduction processes
improved asymptotic approximations for transient conduction and diffusion processes, 205
- Transient diffusion processes
improved asymptotic approximations for transient conduction and diffusion processes, 205
- Trickle-bed fluid dynamics
some experiences with the application of the percolation concept for modeling trickle-bed fluid dynamics, 67
- Turbulent diffusion flames
modelling and validation of soot concentration patterns of turbulent diffusion flames based on data from plug flow reactor experiments, 401
- UV absorption
comparison of the enzyme inhibition effect of different humic substances in aqueous solution, 325
- Vapour fraction
flow boiling heat transfer to saturated pure components and non-azeotropic mixtures in a horizontal tube, 261
- Velocity profiles
NMR flow imaging of pastes in steady-state flows, 385
- Vibration dewatering
vibration dewatering, 331
- Volume concentrations
NMR flow imaging of pastes in steady-state flows, 385
- Volumetric mass-transfer coefficient
a review of recent chemical techniques for the determination of the volumetric mass-transfer coefficient $k_L a$ in gas-liquid reactors, 247
- Wall-to-liquid mass transfer
wall-to-liquid mass transfer in a packed-bed reactor: influence of Schmidt number, 189
- Wastewater
a comparative study of wastewater treatment by chemical wet oxidation, 199
- Water-ethanol mixtures
effect of transfer in the vapour phase on the extraction by pervaporation through organophilic membranes: experimental analysis on model solutions and theoretical extrapolation, 449
- Zirconia support
the oxidation of carbon monoxide by oxygen over platinum-, palladium- and rhodium catalysts from 10^{-10} to 1 bar, 363
